I am a recent engineering graduate. During my education, I got interested in programming and tried to study a bit of coding. I found that I like it quite well and I can learn it quickly.

I love to code, I love to build new things that make our life a better experience. I am a quick learner and I am very enthusiastic. I am an excellent team-oriented player and have good communication skills too.

I am looking for a developer position in an organization where I can learn more to advance my skills.
